EXPERIENCE

TranslateMe Network, Western Cape / Delhi – Co-Founder and CTO **Mar 2023 – Present**

Mobile platform working with language data to create large language model (LLM) datasets in 41+ languages for enterprises in the Africa market ($1M revenue | 28-member team). Acquired by a large African conglomerate in late 2025; currently leading the merger of team and resources and the launch of conversational AI agents built on TranslateMe data.

- Led 14-member team to develop platform incentivizing users to translate phrases in their native languages for AI model training; scaled Android app from 5,000 to 1M+ users
- Manage $200K tech P&L encompassing salaries, technical architecture costs, purchase licenses and tech subscriptions
- Developed language models for 11 African languages, achieving 92% accuracy; oversaw creation of language models across 30 more languages, reducing time-to-market by 70%
- Built automated affiliate integration with leading messaging app, leading to 90% increase in acquired users and 40% reduction in customer acquisition costs
- Built TMN coin, a payment token backed by stablecoins (NEO, USDT), to settle cross-border payouts to a 9,000-member language expert community across 23 regions; enabled scaling to 1M+ users
- Listed the token on major exchanges including Binance and Coinbase so contributors could convert earnings to local currency; published daily exchange rates on Yahoo Finance for price transparency

Samsung Research, Noida – Software Developer **Feb 2021 – Mar 2023**

- Joined as 3rd employee of the AI Health Group; coordinated the development team of 80 engineers in the health wearables team, creating AI models for Samsung smartwatches to detect outdoor activities and gym exercises
- Developed new AI models to detect 12 additional exercises as part of workout detection on the Galaxy Watch; became 2nd most used feature with 1.8 billion workout detections and 30 billion minutes of activity tracked
- Awarded the "Shining Star Award" for successfully developing and deploying AI models on 600 million+ Samsung Galaxy Watches

EDUCATION

Delhi Technological University – B.Tech, Electronics and Communication Engineering **2016 – 2020**

- Co-authored and presented 7 research papers ranging from Big Data, Computer Vision to Natural Language Processing at world's leading conferences for NLP like ACL, IEEE, COLING (100+ citations to-date)

Hello PM – AI Product Management Bootcamp **Mar 2026 – Jul 2026**

- Focus: product sense and customer understanding, analytical thinking with data, product strategy, roadmapping, go-to-market, operations, competitive market analysis

COMMUNITY LEADERSHIP

Visionaries – Founding Member **Mar 2021 – Present**

- Built a 12-person team and a community of 5,000 volunteers; partnered with 11 schools to academically support 200+ visually impaired students; 4,000+ classes conducted
- Fundraised $25K to sustain operations through 25+ community events; leveraged volunteer base to provide scribes to 3,000+ visually impaired individuals to undertake written examinations
- Led development of an AI dictation tool that allows visually impaired learners to code hands-free; initiated a program teaching professional skills, including accounting, tax preparation, and financial planning

Google Summer of Code — Student & Project Mentor **May 2019 – Feb 2021**

- Selected among 1,134 students from 148 countries; chosen as one of 7 Project Mentors in NLP org; mentored 2 NLP projects for the University of Oxford focused on tools for low-resource languages

ADVISORY & CONSULTING

Hearing Aid Labs, South Africa – Consultant **Mar 2024 – Dec 2024**

- Integrated AI model that analyzes 50,000 monthly customer interactions for South Africa's largest audiology retail chain; reduced marketing spend by 60% across 24 stores while maintaining patient treatment volumes
- Enhanced customer support by integrating AI, reducing response times from 38 minutes to 1 minute; improved Net Promoter Score (NPS) by 30%

Ayurvedic Promise (Healthiclick LLP), India – Venture Advisor **Feb 2025 – Present**

- Advising an AI-driven health-tech startup on go-to-market strategy, user acquisition, and product positioning; helped scale to 10,000 active users, reach initial product–market fit, and rebrand as Ayurvedic Promise
- Helped secure a grant of $22,000 by Govt. of India; preparing the venture for a seed round of ~$750K
